EXPERIENCE

RAZORPAY **Bangalore, India**

Data and Product

Risk, Trust & Safety *Nov23 – Present*

Insight Projects:

- **Defined** UPI & Cards fraud-control **strategy** from scratch (**$25M annual exposure**); scoped problem, **aligned ops/engineering/PM stakeholders**, and oversaw end-to-end implementation; identified >30% mitigation opportunity
- **Led product strategy analytics** across BU teams to design a new-risk engine for SR uplift & fraud control of **cross-border payments, boosting SR** by **0.5%** and controlling fraud from 7% to **market leading <0.2%**

AI & ML:

- Led AI strategy for pod**: scoped, vibe-coded, deployed and drove adoption of** an **AI Slack bot** across 6 teams**,** cut insight MTTR by 90% for 100+ stakeholders & saved **30 days/month**, solution framework expanding across 3+ pods
- Enabled faster & comprehensive risk investigation by co-creating an AI agent that **scans 2k+ merchants' websites**, transactions & documents daily to score them on risk, saving **50 days/month** of manual investigations
- Applied LLMs to surface a new merchant risk signal **(~20 merchants** disabled/month) and improve **customer interaction quality by 20%** through intelligent email triage insights & **copywriting changes**
- **Worked with data-science** to revamp an existing ML model by removing inherent model biases & **creating** a retraining **automation system,** moving model **accuracy up** by **30%** and cutting manual reviews by **20 analyst-days/month**

Experimentation:

- **Owned** inference of a block-override **experiment** to evaluate Shield's performance **(an API product)**; analysed override transactions to **infer population** fraud rates, **lowering** declines by 2% (**input**) while **controlling** fraud & disputes (**output**)
- **Led A/B test design,** inference & stakeholder communication to evaluate **build vs buy product decision** of an ML model

Product Maintenance & Improvement:

- Led cross-functional automations for Onboarding & KYC merchant risk, improving fuzzy-match dedupe-coverage by 20%
- Led **optimisations** for merchant risk system's 1-10 phase, reducing workflows by **30%** & saving **2000** monthly man **hours**
- **Conducted POCs** for vendor integrations (Fingerprint, Truecaller, Perfios) to enhance product intelligence & capabilities

Offers Engine | Platform Product *Dec'25 – Present*

0-1 Experience:

- Sole analyst in the pod, built **first accurate reporting after 1.5 years** of pod operations by collaborating across 6 teams
- **Co-created FY27 product strategy**; solely **authored analytics OKRs for Q1** & automated reporting workflows using skills
- Kickstarted and program-managed offer failure-rate RCA end-to-end with engineers, **halving it (40%->20%)** in 4 weeks

BIJAK **Gurgaon, India**

Early stage (series B) B2B agri trading marketplace enabling trade of $500M GMV

Product Analyst | Engagement, Growth and ERP (sole product analyst in the technology team) *Mar 2022 - Sep 2022*

- Conceptualised and **implemented cohort-based shortcuts** on home screen, boosted new feature discovery by **15-40%**
- Integrated a correlation-matrix to enable **cross-discovery** of products – est. increase in **feed engagement by 20%**
- Wrote a concept-note for call-rating feature, optimised touchpoints for invoice creation and reduced drop-off by >20%

PORTER **Bangalore, India**

Business Analyst | Booking Experience, Allocation/Fulfilment, Customer App *Jan 2021 - Feb 2022*

- Designed metrics & **ran A/B tests for 8 feature releases** such as auto-pickup & multi-stops –increasing in-app vehicle discovery, **boosting conversion by 10%** & cutting API hits by 20%, driving **orders/sessions KPI up by 15%**
- Enabled SLA improvement by testing hypotheses to improve partner arrival time (ETA) & **trip time accuracy by 33-40%**
- Maintained a data-app used by 200+ members for surge pricing decisions, boosting topline & reducing analyst overhead

SKILLS AND ACHIEVEMENTS

General: Problem Framing, Stakeholder Management, Roadmap Strategy & Prioritisation, User Research, KPI Creation

Technology: Vibe Coding, AI-Automations, API & Webhooks, AI Evals, Application Deployment, Low-Level System Design

Data: Root Cause Analysis, A/B testing, Causal Inference, Significance Testing, Funnel Analytics, Data Pipelines, ML, SQL

Courses (LinkedIn Learning): Product Management Fundamentals**,** Create a GTM Plan, Value Based Pricing, AI Engineering

Razorpay Awards: *Annual Award (2025, Innovation, 1/150 data team),* MVP x 4 (2024-2026), Embark Warrior (2024)

EDUCATION

BITS Pilani, Goa Campus (*Integrated Masters***:** *Mathematics***)** *Aug 2016 - July 2020*

- Received KVPY scholarship from Government of India, covering 25% of tuition costs
- Moot-Court Coordinator**: Co-led a team of 20** to host India's biggest *independent* Moot-Court
- Project Lead of Nirmaan: Led a team of 40 to **tutor kids in a slum**; 2/40 selected for state-sponsored education
