

EXPERIENCE**RAZORPAY**

Bangalore, India

Data and AI Products | Risk, Trust & Safety | Offers Engine

Nov23 – Present

AI & ML:

- Scoped, built, and deployed a LangChain Agent that scans **\$200B annually in payments** for suspicious clusters, investigates with **8+ tool calls**, and blocks real-time transactions; adopted by **6 teams & 100+ stakeholders**, **reducing insight MTTR by 90%** and saving **~30 person-days/month**; recognized by **NPCI** as a top innovation in payments fraud
- Enabled faster & comprehensive risk investigation by co-creating an **AI agent** that **scans 12k+ merchants' websites**, transactions & documents daily to score them on risk, saving **50 days/month** of manual investigations
- Led AI transformation of Offers pod**: created Skills for data queries and reporting, **completely removing analyst dependence for reporting and L1/L2 RCAs**; automated finance-recon workflows, collectively saving **~12 days/month**
- Applied LLMs to surface a new merchant risk signal (**~20 merchants disabled/month**) and improve **customer interaction quality by 20%** through intelligent email triage insights & **copywriting changes**
- Made Razorpay's risk-engine analytics self-serve by **creating a skill-suite** for rule performance analysis, fraud-driven rule creation & calculate blast radius of changes: enabling 6 non-platform teams to make independent decisions
- Worked with data-science** to revamp an existing ML model by removing inherent model biases & **creating a retraining automation system**, moving model **accuracy up by 30%** and cutting manual reviews by **20 analyst-days/month**

Insight Projects:

- Defined UPI & Cards fraud-control strategy** from scratch (**\$25M annual exposure**); scoped problem, **aligned ops/engineering/PM stakeholders**, and oversaw end-to-end implementation; identified >30% mitigation opportunity
- Led product strategy analytics** across product verticals to design a new-risk engine for SR uplift & fraud control of **cross-border payments**, **boosting SR by 0.5%** and controlling fraud from 7% to **market leading <0.2%**

Experimentation:

- Owned** inference of a block-override **experiment** to evaluate Shield's performance (an API product); **RCA-ed outages** & inferred population fraud rates, **lowering declines by 2% (input)** while **controlling fraud & disputes (output)** with insights
- Led A/B test design**, inference & stakeholder communication to evaluate **build vs buy product decision** of an ML model

Product Maintenance & Improvement:

- Led cross-functional automations for Onboarding & KYC merchant risk, improving fuzzy-match dedupe-coverage by 20%
- Led **optimisations** for merchant risk system's 1-10 phase, reducing workflows by **30%** & saving **2000 monthly man hours**
- Conducted POCs** for vendor integrations (Fingerprint, Truecaller, Perfios) to enhance product intelligence & capabilities
- Kickstarted and program-managed offer failure-rate RCA end-to-end with engineers, **halving it (40%→20%)** in 4 weeks

BIJAK

Gurgaon, India

Early stage (series B) B2B agri trading marketplace enabling trade of \$500M GMV

Product Analyst | Engagement, Growth and ERP (sole product analyst in the technology team)

Mar 2022 - Sep 2022

- Conceptualised and **implemented cohort-based shortcuts** on home screen, boosted new feature discovery by **15-40%**
- Integrated a correlation-matrix to enable **cross-discovery** of products – est. increase in **feed engagement by 20%**
- Wrote a concept-note for call-rating feature, optimised touchpoints for invoice creation and reduced drop-off by >20%

PORTER

Bangalore, India

Business Analyst | Booking Experience, Allocation/Fulfilment, Customer App

Jan 2021 - Feb 2022

- Designed metrics & **ran A/B tests for 8 feature releases** such as auto-pickup & multi-stops –increasing in-app vehicle discovery, **boosting conversion by 10%** & cutting API hits by 20%, driving **orders/sessions KPI up by 15%**
- Enabled SLA improvement by testing hypotheses to improve partner arrival time (ETA) & **trip time accuracy by 33-40%**
- Maintained a data-app used by 200+ members for surge pricing decisions, boosting topline & reducing analyst overhead

SKILLS AND ACHIEVEMENTS**General:** Problem Framing, Stakeholder Management, Roadmap Strategy & Prioritisation, User Research, KPI Creation**Technology:** Vibe Coding, AI-Automations, API & Webhooks, AI Evals, Application Deployment, Low-Level System Design**Data:** Root Cause Analysis, A/B testing, Causal Inference, Significance Testing, Funnel Analytics, Data Pipelines, ML, SQL**Courses (LinkedIn Learning):** Product Management Fundamentals, Create a GTM Plan, Value Based Pricing, AI Engineering**Razorpay Awards:** Annual Award (2025, Innovation, 1/150 data team), MVP x 4 (2024-2026), Embark Warrior (2024)**EDUCATION**

BITS Pilani, Goa Campus

Aug 2016 - July 2020

- Received KVPY scholarship from Government of India for 2 years, covering 25% of tuition costs
- Moot-Court Coordinator: **Co-led a team of 20** to host India's biggest *independent* Moot-Court
- Project Lead of Nirmaan: Led a team of 40 to **tutor kids in a slum**; 2/40 selected for state-sponsored education
- GMAT: 99thile (not pursuing an MBA)
