EXPERIENCE

RAZORPAY **Bangalore, India**

Product and Data

Risk, Trust & Safety *Nov23 – Present*

Insight Projects:

- Defined fraud control strategy for **UPI & Cards** from **scratch ($25M annually),** collaborating with **ops, engineering and PMs**; identified mitigation opportunity for **>30%**; overseeing project success across scoping, implementation and IA
- **Partnered** across BU teams to design a new-risk engine for cross-border payments' **SR uplift & fraud control,** boosting **SR** by **0.5%** and **controlling fraud** from 7% to **market leading <0.2%**

AI & ML:

- Led AI strategy for pod**: scoped, vibe-coded, deployed and socialised** an **AI Slack bot** across **6 teams,** reducing MTTR of insights by 90% for 100+ stakeholders & saved **30 man-days/month**, solution framework in dev across 3+ pods
- Co-engineered a **website-risk assessment agent** to automate merchant risk analysis, saving est. **600 hours/month**
- **Improved** merchant-risk decisioning by contributing to the ML feature set redesign, removing inherent model biases & creating a **retraining** automation**, increasing** accuracy by **30%** and cutting manual reviews by **20 analyst-days/month**
- Applied LLMs to add a new merchant risk signal **(~20 merchants** disabled/month) and improve the **interactions-per-merchant** metric (CX indicator) **by 20%** by filtering automated inbound emails and enhancing outbound email content

Experimentation:

- **Leveraged** block-override **experiment** (10% declines let through) to evaluate rule performance; analysed override transactions to **infer population-level fraud rates**, **lowering** declines by **2%** while **stabilising fraud** & disputes
- **Led design, inference and communication** of an **A/B test** to evaluate replacing a 3P vendor with an in-house ML model

Product Maintenance & Improvement:

- Led cross-functional automations for Onboarding & KYC merchant risk, improving fuzzy-match dedupe-coverage by 20%
- Led **optimisations** for merchant risk system's 1-10 phase, reducing workflows by **30%** & saving **2000** monthly man **hours**
- Built data pipelines to **overhaul** a legacy reporting-system, improved metric reliability that scales with product transition
- **Advanced** vendor integrations (Fingerprint, Truecaller, Visa) into existing systems to **increase** risk-mitigation capabilities

Offers Engine | Platform Product *Dec'25 – Present*

0-1 Experience:

- Sole analyst in the pod; collaborated across 6 BUs to build **first ever accurate reporting view** after 1.5 years of pod-ops
- **Kickstarted & program-managed** offer engine failure rate RCA with engineers, reducing to **20%** from **40%** in **4 weeks**
- Co-created FY27 product strategy, **solely defined** analytics **OKRs for FY27Q1**, automating data workflows using skills

BIJAK **Gurgaon, India**

Early stage (series B) B2B agri trading marketplace enabling trade of $500M GMV

Product Analyst | Engagement, Growth and ERP (sole product analyst in the technology team) *Mar 2022 - Sep 2022*

- Conceptualised and **implemented cohort-based shortcuts** on home screen, boosted new feature discovery by **15-40%**
- Integrated a correlation-matrix to enable **cross-discovery** of products – est. increase in **feed engagement by 20%**
- Wrote a concept-note for call-rating feature, optimised touchpoints for invoice creation and reduced drop-off by >20%

PORTER **Bangalore, India**

Business Analyst | Booking Experience, Allocation/Fulfilment, Partner Apps *Jan 2021 - Feb 2022*

- Designed metrics & **ran A/B tests for 8 feature releases** such as auto-pickup & multi-stops –increasing in-app vehicle discovery, **boosting conversion by 10%** & cutting API hits by 20%, driving **orders/sessions KPI up by 15%**
- Enabled SLA improvement by testing hypotheses to improve partner arrival time (ETA) & **trip time accuracy by 33-40%**
- Maintained a data-app used by 200+ members for surge pricing decisions, boosting topline & reducing analyst overhead

SKILLS AND ACHIEVEMENTS

Generalist: Problem Framing, Stakeholder Management, Roadmap Strategy, Roadmap Prioritisation, KPI Definition

Technology: Vibe Coding, AI-Automations, API & Webhooks, AI Evals, Application Deployment, Low-level system design

Data: Root Cause Analysis, A/B testing, Causal Inference, Significance Testing, Funnel Analytics, Data Pipelines, ML, SQL

Razorpay Awards: Annual Award (2025, Innovation, 1/150 data team), MVP x 4 (2024-2026), Embark Warrior (2024)

EDUCATION

BITS Pilani, Goa Campus (*Integrated Masters***:** *Mathematics***)** *Aug 2016 - July 2020*

- Received KVPY scholarship from Government of India, covering 25% of tuition costs for 2 years
- Moot-Court Coordinator**: Co-led a team of 20** to host India's biggest *independent* Moot-Court
- Project Lead of Nirmaan: Led a team of 40 to **tutor kids in a slum**; 2/40 selected for state-sponsored education
- Summer Intern: Crompton Greaves
